

Template for reporting bugs

If you find any bug, please, report it using the following template:

Topic: Brief description of the bug

Body: test-case and a whole description of the bug as simple as possible to reproduce the error. It could be also missing features Tornado will need for E2Data.

The test-case is a steck of Java code that can shows the error and can easely be integrated in our Tornado unittesting system.

Generated code: Using `tornado --printKernel --debug <YourClass>` will print the generated OpenCL Kernel and internal debug information in Tornado, such as device info and number of threads.

Errors can be reported to:

- 1) Github using Tornado Issues: [link](#)
- 2) Via email to Juan Fumero: juan.fumero@manchester.ac.uk
